DETAILED ACTION

Claims 2 and 4-7 are pending in this Office Action. Claims 1 and 3 were cancelled by the Applicant (2 August 2004 and 29 December 2003, respectively).

Reasons for Allowance

The polynucleotide of the Instant Application encodes a novel and nonobvious inhibitory amino acid transporter, as demonstrated by Applicants and confirmed recently by others (see, for example: Chessler, et al, 2002, Diabetes, 51: 1763-1771, of record). The claims of the instant application are directed to the polynucleotide of SEQ ID NO: 1, as well as vectors and recombinantly-produced cells comprising the polynucleotide of SEQ ID NO: 1. The claims are free of the prior art, as the polynucleotide has not been studied in the prior art. The specification provides experimental evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.
